

TUNNEL LINING SOLUTIONS

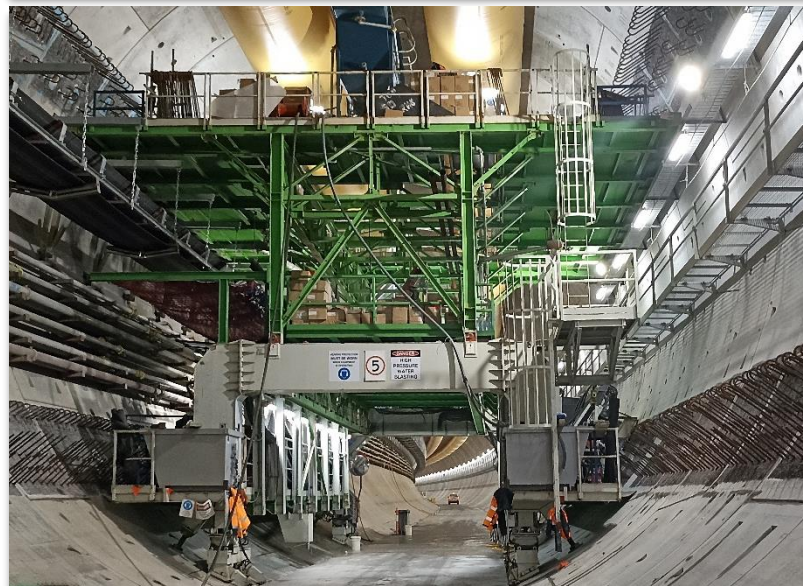

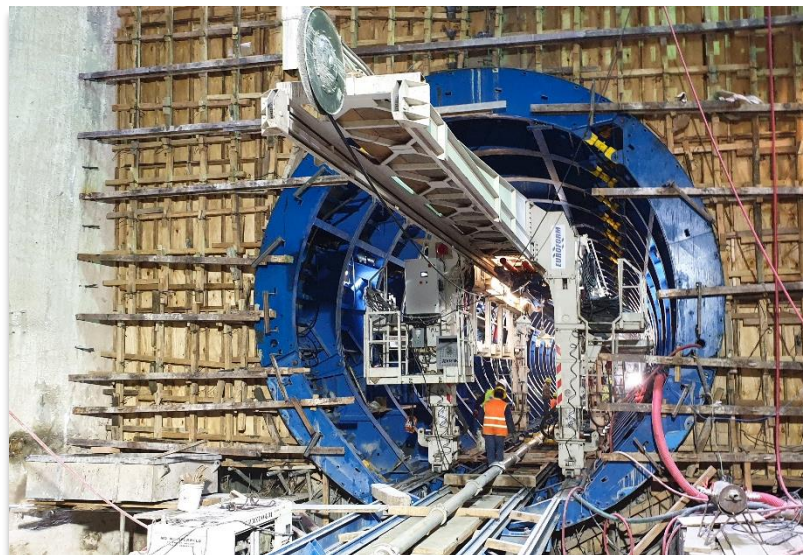

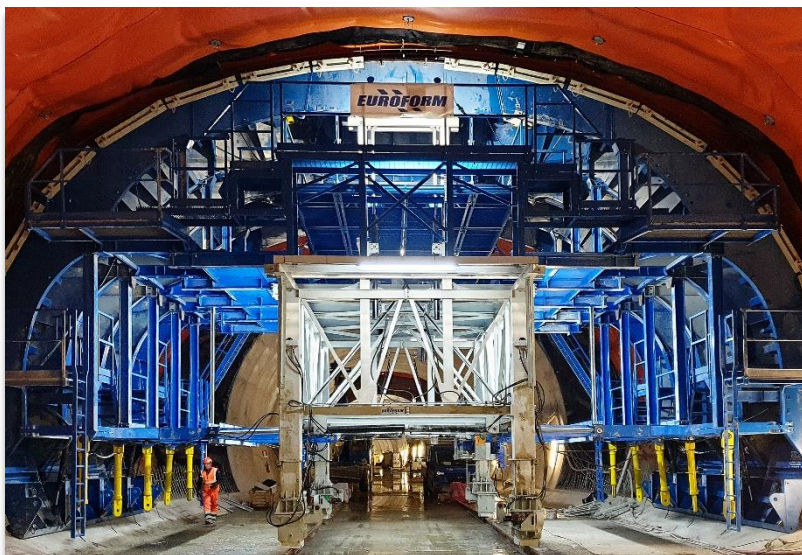

Euroform – Short Introduction

- Euroform was established in 1994.
- Euroform is a reliable and well-known partner in the tunnelling sector, highly specialised in the design and manufacture of formwork and equipment for both conventional and mechanised tunnelling. From the conception up to the completion of the project, Euroform remains at the customer's side to provide continuous support.
- Since 2006, Euroform is a 100% subsidiary of Herrenknecht AG.

Euroform – Reference Projects

Euroform – Product Portfolio

- Conventional vault tunnel formwork.
- Telescopic and self launching FullRound formwork.
- Modular formwork for variable cross sections.
- Formwork for invert, cross passage, niche, smoke duct slabs and corbels.
- Reinforcement gantry, membrane gantry, curing gantry, service gantry.
- Back-end works equipment
- Internal Structure Installation Gantry (ISIG).
- Segment moulds and carousel system.
- Service and special equipment.

Conventional tunnel lining – Self supporting formwork

Conventional tunnel lining – Self reacting formwork

Conventional tunnel lining – Modular formwork adjustable on different tunnel profiles

Conventional tunnel lining – FullRound formwork

Conventional tunnel lining – Invert formwork

Conventional tunnel lining – Collar formwork for intersection between main tunnel and cross passage, and Cross passage formwork

Conventional tunnel lining – Smoke duct tables

Conventional tunnel lining – Rebar gantry

Conventional tunnel lining – Membrane gantry

Conventional tunnel lining – Curing gantry

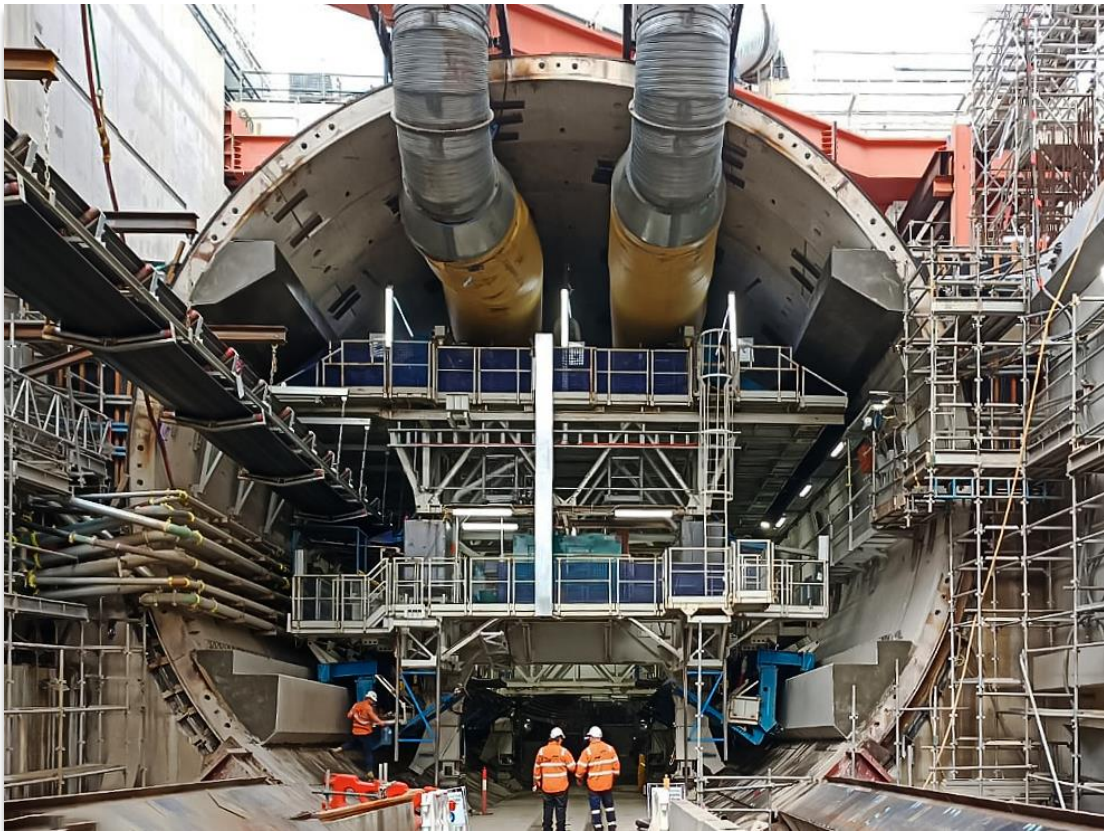

Back-end work equipment – Scabbling and drilling gantry

Back-end work equipment – Rebar gantry

Back-end work equipment – Corbel formwork

Back-end work equipment – Pipe laying gantry

Back-end work equipment – Smoke and duct slab laying gantry

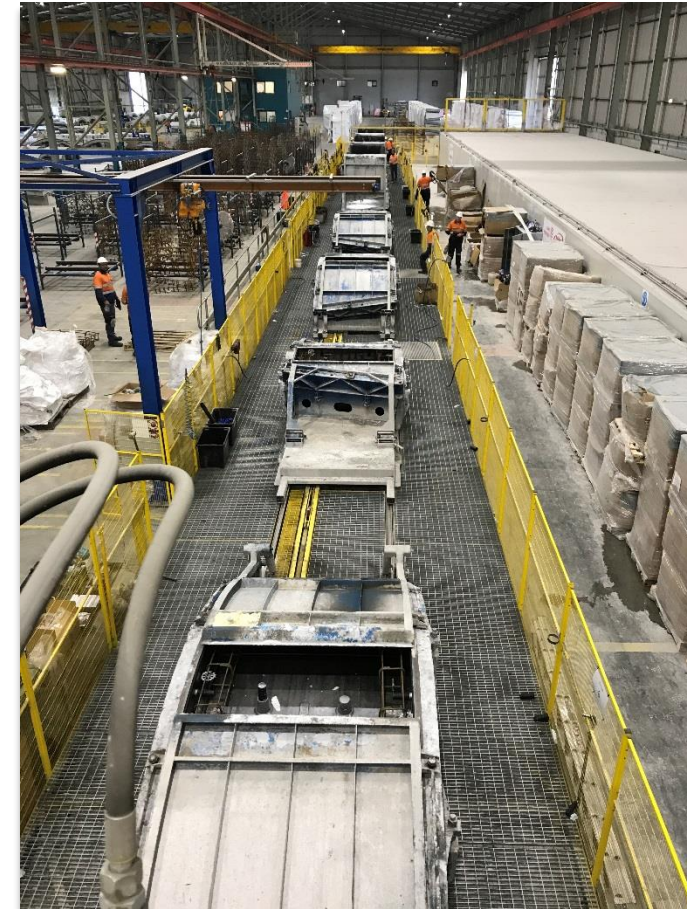

Internal Structure Installation Gantry (ISIG)

Precast tunnel lining – Segment moulds & carousel plant

For Italian market or worldwide projects wherever an Italian Construction Co. is in JV and responsible for procurement of segment moulds.

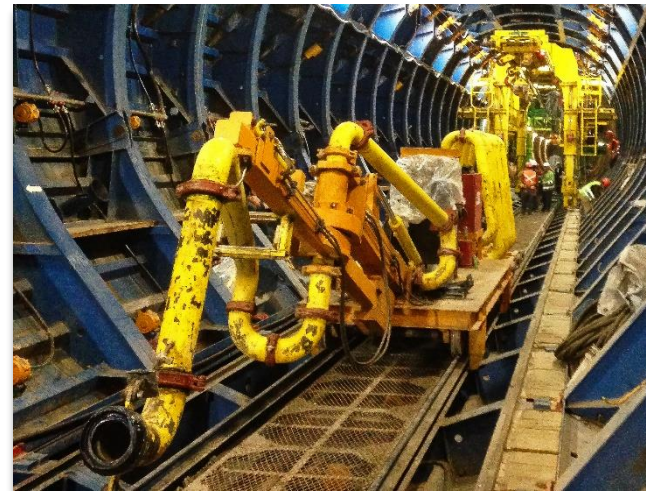

Precast tunnel lining – Segment moulds for horseshoe tunnel

Service equipment – Segment handling devices

Special equipment

Always by your side

In order to support the customer when developing and realizing a project, Euroform offers a wide range of services upon request.

- Consultancy in the feasibility study of the project.
- Laser tracker measurement of moulds, segments, and mock-up rings.
- Assembly and measurement of segment mock-up rings.
- Support for site set-up and assembly of the equipment.
- Personnel training.
- Equipment maintenance.
- Equipment refurbishment.
